

Contract Insight® Fast A Contract Management Software Crash Course

Read this blog for a rapid, high-level, general overview of CobbleStone Software's **contract management software** suite - Contract Insight®, its purpose, and some of its key features.

Let's get started with your **Contract Insight** crash course. *Ready. Set. GO!*

Why Use Contract Management Software?

Most organizations from a wide variety of **industries** provide products and services. Their processes often require partners, such as vendors, suppliers, customers, and subcontractors. To manage these relationships, organizations use various contracts and agreements. Organizations also need employees and - to manage these relationships - they use documents pertaining to policies and procedures.

What is CobbleStone Software?

CobbleStone Software helps legal, sales, procurement, risk, and other professionals to more efficiently and effectively manage contracts and agreements. CobbleStone Software's leading contract management software solution - Contract Insight - helps organizations to centralize and streamline contract management, vendor management, and **procurement software** processes - all on one user-friendly platform.

How Can Contract Insight Contract Management Software Help?

CobbleStone Software's Contract Insight can automate, expedite, and improve the management of the documents, materials, processes, and people mentioned above - in a myriad of visionary ways. For our crash course, we will briefly touch on two of the most critical contract management software tools and features organizations should get started with right away for increased ROI.

VISDOM AI®: Leading-Edge Contract Intelligence

CobbleStone Software's proprietary contract management AI engine - **VISDOM AI** - exists within and functions in tandem with Contract Insight. VISDOM **contract intelligence** helps identify contracts, contract clauses, and contract key data and makes advanced recommendations for the allocation and use of these assets. It automates data extraction, intelligently analyzes key data, and constantly improves with training data continuously being leveraged by the engine for further machine learning.

VISDOM helps with task management by equipping Contract Insight users with dynamic, configurable task assignment functionality, task escalation, and an overall improved culture of accountability. **Intelligent contract workflow automation** helps with the organized and seamless routing of legal documents - streamlining **contract lifecycle management** processes.

IntelliSign® Electronic Signature Software

IntelliSign is CobbleStone Software's proprietary electronic signature software tool - used for electronic signatures and document acknowledgements. It helps organizations of ranging industries to manage their contract repositories, **contract renewals**, and contract closeout. The automation of eSigning with IntelliSign can cut send-to-sign time by up to twenty percent. Additionally, IntelliSign provides powerful **reporting and analytics** tools, **contract management dashboards**, and contract compliance monitoring alerts.
