

End-to-End AI-Powered eDiscovery

Luminance Discovery uses next-generation AI, providing legal professionals with an end-to-end eDiscovery platform. Able to enhance and expedite a vast range of processes, from eDiscovery and Early Case Assessment (ECA) to requests for personal information such as Data Subject Access Requests (DSARs), Luminance can be used across a range of investigations, arbitrations and litigation matters. The technology can be deployed and used within hours, requiring no pre-programming or lengthy user onboarding. Trusted by over 500 customers, including a quarter of the world's top 100 law firms and global organizations such as Tesco, Ferrero and all of the 'Big Four', Luminance ensures the quickest, most thorough review, ensuring no stone is left unturned.

**AI-POWERED ECA FOR POWERFUL
SEARCHING AND CULLING**

**CONCEPTUAL UNDERSTANDING
FOR ROBUST SEARCHING**

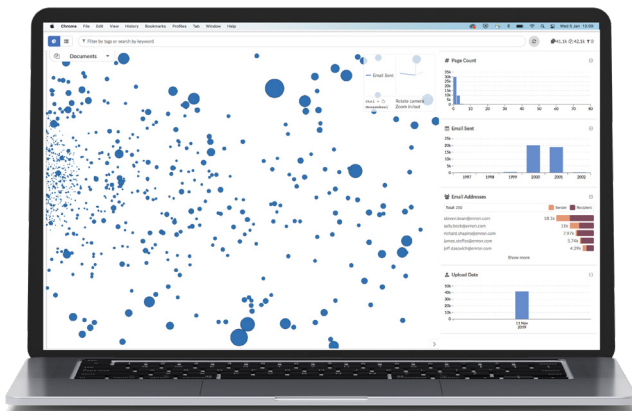

**AI-POWERED TAR FOR QUICK,
THOROUGH AND AUDITABLE CODING**

**USE WITHIN HOURS,
NO TRAINING REQUIRED**

EASY TO USE: BEGIN MATTERS WITHIN HOURS

A plug-and-play platform deployed via the cloud, Luminance enables lawyers to begin their first review in less than 30 minutes, with no machine or user training necessary.

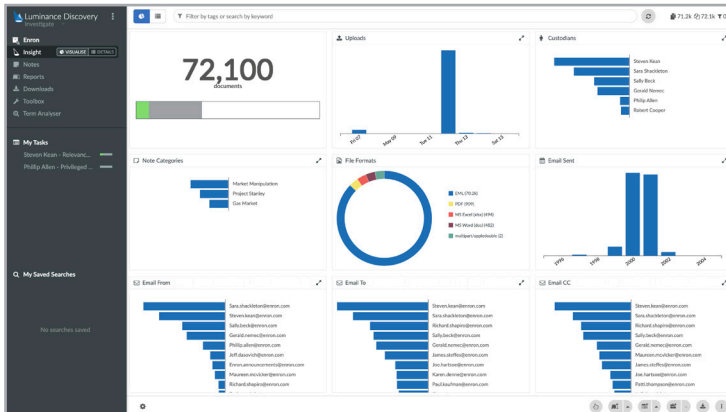

AI ANALYSIS FOR RAPID OVERVIEW OF DOCUMENTS

Luminance's AI reads and forms an understanding of documents upon import, then represents all documents within the dataset across a series of interactive widgets and 3D visualizations, helping lawyers to quickly find what they are looking for.

TRUSTED BY **500+ ORGANIZATIONS**

ENSURE NOTHING IS OVERLOOKED WITH AI-POWERED ECA

With AI-powered ECA, lawyers can quickly and easily apply powerful searches and filters to cull irrelevant documents and find what matters. Luminance understands documents on a conceptual level, allowing lawyers to search for conceptually similar documents to the one under review in just one click. Lawyers can easily navigate between documents, including support for Microsoft Excel, WhatsApp and Skype Conversation files.

CASE STUDY

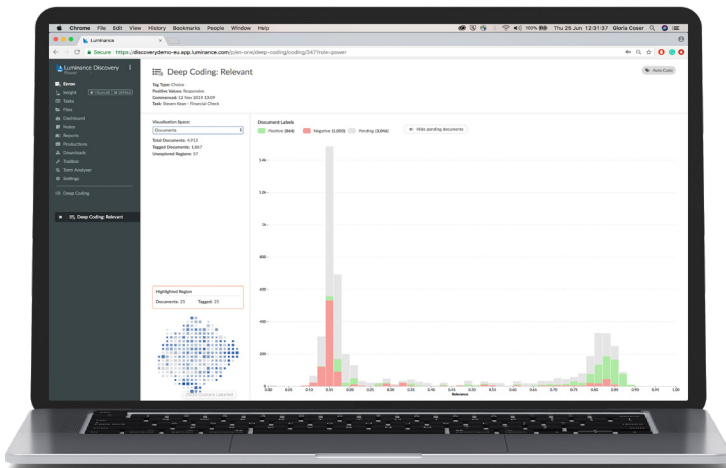

Burness Paull was able to reduce the dataset of over 6,000 documents by 80% in just a few minutes.

“We have been seeing the size of typical client datasets increase exponentially in recent years, making Technology Assisted Review using powerful tools like Luminance Discovery increasingly essential for lawyers.”

Sam Moore, former Innovation Manager

AI-DRIVEN TECHNOLOGY ASSISTED REVIEW

Luminance's AI can observe the coding actions of the team and then flag where the coding of a document appears anomalous compared to how similar documents have been coded in case this warrants a further review. Luminance can also predict how relevant yet-uncoded documents will be, ensuring lawyers can focus their time effectively.

“Luminance is fabulous - makes my life easier.”

Rose Eady, Solicitor

morgan rose

With no prior training needed, Luminance's Heat Map organizes the entire dataset by conceptual similarity, with each tile representing conceptually-alike documents. The depth of color of each tile illustrates how many of these documents have been reviewed, making sure lawyers can allocate resources to under-investigated areas quickly so nothing is overlooked.

SAVE TIME, REDUCE COSTS AND GAIN A STRONGER NEGOTIATING POSITION

With faster identification of key information, lawyers gain an immediate understanding of the relative strengths and weaknesses of a case, placing them in the best position to provide strategic advice, negotiate or settle.

CASE STUDY

Norburg & Scherp

The firm estimated that they were able to work 10 times faster using Luminance Discovery compared to other tools.

"In the eDiscovery market, where cost is a high priority, this is a gamechanger."

Pontus Scherp, Partner

SCALABLE FOR MATTERS OF ANY SIZE

From DSARs to TBs of litigation data, Luminance is equally effective across both large and small projects.

CASE STUDY

大成 DENTONS

Despite having not used the technology before, Luminance helped Dentons Middle East to review over 180,000 documents in two weeks, a time saving of 80%.

"We decided to make Luminance the standard document review platform for all our projects going forward."

Zahra Rose Khawaja, Associate

USE ON DOCUMENTS OF ANY LANGUAGE

Luminance's advanced pattern recognition technology means that it is language-agnostic, ensuring lawyers can use Luminance on documents in any language and even on datasets containing multiple languages.

"The fact that the technology is language-agnostic makes it uniquely capable of digesting the geographically wide-ranging documents we upload to Luminance."

Yan Pecoraro, Partner

AUTOMATIC PII DETECTION AND REDACTION

Luminance can detect Personally Identifiable Information (PII) and redact all examples of certain critical and confidential types of information (for example, users could redact all addresses across their entire project).

COURT-COMPLIANT, WORD-INTEGRATED PRODUCTION

Luminance's robust production capabilities can be fully customized to suit any regulator/court requirements. Seamless Word integration allows users to upload any Word file containing production references, and Luminance will automatically convert any production ID into a hyperlink which can be sent to any Luminance user. Alternatively, lawyers can upload a Word file containing document references into Luminance's e-bundling tool, and receive a single download containing every document referenced in the file, in the referenced order.

"By using Luminance, we're able to pull together the relevant material for cross-examination bundles within a matter of minutes."

Sally Hobson, Barrister

DEDICATED ACCOUNT MANAGER AND 24/7 SUPPORT

Luminance can offer advice on best practices and suggestions tailored to the specific requirements of your firm and client. Support is available 24/7, including via screensharing sessions, to troubleshoot and assist with product queries and technical issues.
