

CLOUDSCALE 365

END-TO-END MANAGED
LEGAL IT SOLUTIONS

CloudScale365, Inc. is a fully managed IT solutions provider, delivering the right technology set and immediate support to facilitate internal technical processes and accelerate revenue and business growth. We combine technology leadership and industry knowledge to become a single-source IT solutions provider for legal professionals and law firms.

CloudScale365, Inc. offers a range of services that help legal professionals ensure access to data anytime, anywhere on the cloud, guarantee cybersecurity, streamline eDiscovery, and ensure compliance.

We provide custom cloud solutions, VDI, email, Microsoft 365, mobile device management and more, backed up by the highest level of security and 24/7/365 support. CloudScale365 helps you balance cost and functionality to integrate digital technology with legal processes. **For us, managing technology is all about helping our clients operate more effectively!**

Industry Challenges

Address them with dramatically higher simplicity, security, and performance

“Almost 44% of small law firms fail to budget for IT, despite over 60% of respondents acknowledging that IT is a pressing concern.”, American Bar Association

IT teams in the legal sector are under constant pressure to do more with less. Busy legal teams need around-the-clock access to documents, and today's remote staff need the same environment, whether in the office or at home. Technological complexity should not distract you from the billable business.

Accessibility

Access your data anytime, regardless of your location

Security

Protect your sensitive data and the reputation you've built for your law firm

Support

Receive ongoing technical support to maintain productivity levels and profitability

Why do legal professionals need a Managed Service Provider

The need for managed IT services ranges from simple things like forgotten passwords to massive data losses and security breaches. When thinking about your law firm, you need to partner with a managed IT service provider who can handle your environment and deliver prompt support 24/7/365. For a law firm, data protection, secure

communication, smooth business operations and help around the clock is crucial to success. Managed IT Solutions help legal professionals ensure data security, privacy & compliance, streamline eDiscovery and document

management and integrate digital technology with legal processes.

We solve the most challenging IT problem for legal professionals:

- Guaranteed secure email communication
- Remote management of mobile devices
- Eliminated downtime
- Stable online presence to generate new business leads online
- Improved security
- A move towards the cloud and virtual IT services
- Full IT audit and recommendations
- IT support at the moment you need it

How CloudScale365 can Help your Legal Practice

● Immediate response

Legal professionals work in fast-paced and time-sensitive environments. If something goes wrong, you need responsive and knowledgeable IT experts to get you back up and running as soon as possible.

● Around-the-clock Helpdesk

It's vital for law firms to have around-the-clock support so your IT infrastructure can be back up and running as soon as possible when things go wrong, and you can get back to doing what you do best.

● End-to-end IT Audit and Recommendations

An Ops expert will review all your current IT systems, servers and users in place and come up with a thorough technology strategy based on where you are now and where you need to be.

● Future-proof Technology

We build and implement custom solutions which can match your business needs and goals. This comes in combination with a thought for the future to avoid unnecessary changes and disruptions in time.

● Fully Managed IT Solutions

Decreased complexity and improved efficiency by getting help from external experts. No need to have an internal dedicated IT team in place. Save time and reduce operational costs to stay competitive.

● Cyber Security

Cyber attacks have grown by over 60% in the last two years. Law firms are often seen as a target for cybercriminals, as they handle sensitive information and don't always have adequate IT security measures to prevent attacks. We guarantee your systems and processes are resilient and secure. We offer two-factor authentication, SSO implementation, ransomware protection and much more.
