
Thomson Reuters Document Intelligence

The next generation of contract review is here

Re-imagine contract review with AI-document understanding and analytics for corporate legal departments.

An abstract digital network visualization consisting of a complex web of interconnected nodes and lines. The nodes are represented by small, glowing spheres in various colors, including blue, cyan, magenta, and orange. The lines connecting them are thin and light blue, creating a dense, mesh-like structure that flows across the frame from left to right. The background is dark, making the glowing elements stand out prominently.

The next generation of contract review is here

Thomson Reuters Document Intelligence AI-powered contract analysis empowers legal teams to identify critical information in seconds to strategically advise their business.

Reduce time-to-value with pre-trained AI

- Utilize pre-built AI-models that work from day one with no user training required
- Leverage accurate, relevant, domain-specific models trained by Practical Law attorney editors
- Tackle hours of manual reading and review in minutes with models designed specifically for legal departments
- Easily deploy integration capabilities with existing document management systems

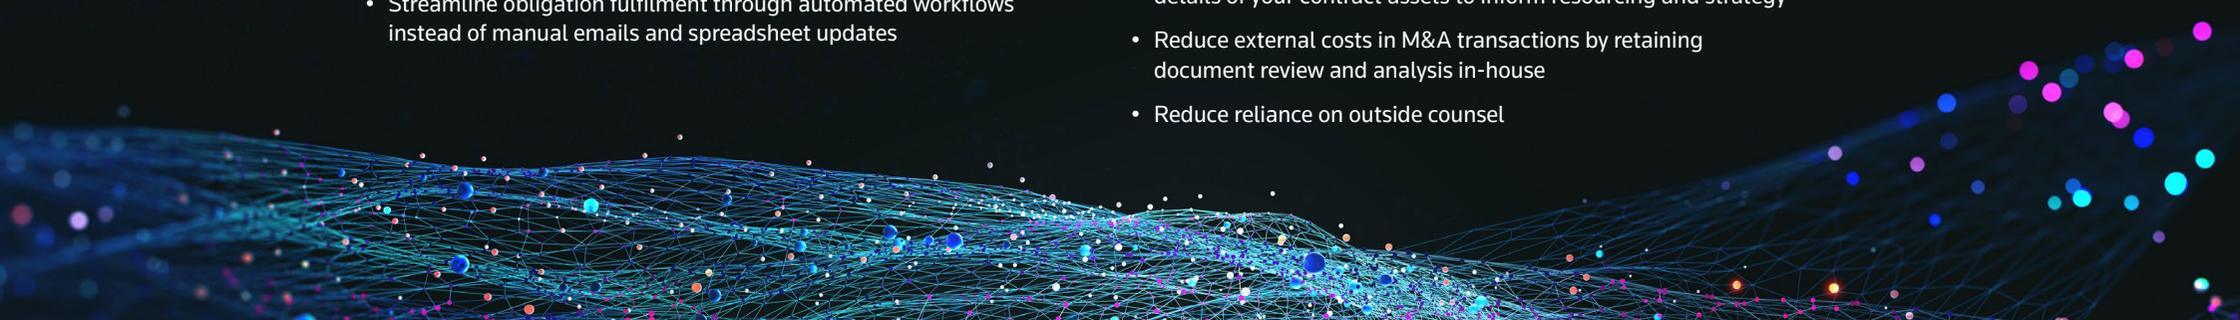

Advise with confidence and simplify obligation management

- Search across an entire portfolio of documents in a few clicks to surface key clauses and obligations
- Identify liability and operational risk to avoid costly penalties
- Never miss critical renewal dates and deadlines
- Turn insights into action across a wide range of business documents when you need it most
- Streamline obligation fulfilment through automated workflows instead of manual emails and spreadsheet updates

Accelerate document review with at a glance contract insights

- Search and extract key clauses in seconds to identify deviations from preferred positions
- Expedite the review of third-party paper contracts
- Conduct gap analysis to identify when a clause is missed
- Scale search to spot-check a single contract or thousands of agreements at the same time
- Alleviate tedious and repetitive manual work
- Identify risk across your portfolio without having to do a one-by-one review

Add deeper, strategic value to the business

- Contribute to growth by uncovering potential cost-saving opportunities within contract assets
 - Capture opportunity costs by having answers today in real time
 - Realize day-to-day operational efficiency gains by turning documents into intelligent assets
 - Shift from reactive to proactive contract management
 - Elevate your reporting capabilities by surfacing quality and granular details of your contract assets to inform resourcing and strategy
 - Reduce external costs in M&A transactions by retaining document review and analysis in-house
 - Reduce reliance on outside counsel
- 

Thomson Reuters Document Intelligence – value on day 1

Realize value faster and move from a reactive to proactive business partner

Thomson Reuters Document Intelligence uses AI models trained by Practical Law attorney editors to ensure models are domain specific and ready to use by in-house lawyers from day one. Simply upload your scanned documents and the platform will automatically separate each discrete document, identify each of the document types, and read the contents to create structured document data you can rely on.

Structured document data allows you to review all the terms and extract key data points from your entire document portfolio without lifting a finger. Looking for something specific? Instead of leafing through files or scrolling through endless pdfs, Thomson Reuters Document Intelligence allows you to filter, sort, and search for the terms you need. Expand your search beyond keywords with AI that has been trained to recognize thousands of terms and understands the similarity of the content implied in the text, automatically.

The screenshot shows a user interface for Thomson Reuters Document Intelligence. At the top, there is a 'Getting Started...' section with a close button (X) and the text 'These courses will help you take your next step with Document Intelligence...'. Below this are four course cards: 'Document Intelligence for Beginners' (Complete), 'Admin Academy' (Not started), 'Document Intelligence for Legal Professionals' (Not started), and 'Shut-in Review in Document Intelligence' (Not started).

The main section is titled 'Dashboards' with the subtitle 'Track relevant data to manage your workflows'. It contains four dashboard cards: '234 Assigned to you' (last opened 3/10/22), 'Workspace Insights' (last opened 3/10/22), 'Document Integri...' (last opened 3/10/22), and 'Duplicate Docum...' (last opened 3/10/22).

Below the dashboards are two columns: 'Recent Documents' and 'Recent Bookmarks'. The 'Recent Documents' column shows two document entries: 'Agreement-421.pdf' (Oil & Gas Lease, last opened 3/10/22, 5 Pages) and 'Deed, Conveyance, and Assignment (1970).pdf' (Oil & Gas Lease, last opened 3/10/22, 5 Pages). The 'Recent Bookmarks' column shows three bookmark entries: 'My Assigned Documents', 'Shut-in Review', and 'Team Project', each with a placeholder for a bookmark description and 'Shared by John Smith'.

Start with a single source of truth for document intensive workflows. Document Intelligence creates structured document data instantly so you have the information you need when you need it.

In this way, in-house lawyers gain an edge; saving time and increasing accuracy of their contract review, allowing them to focus on legal work not paperwork.

Thomson Reuters Document Intelligence – we do the data science, so you don't have to

Combining AI and machine learning with the trusted guidance and knowhow of Thomson Reuters® Practical Law.

Available in the US and trained on contracts for legal departments in multiple sectors, the portfolio of AI models with Thomson Reuters Document Intelligence is ever growing and becoming more intelligent with every day.
