

Solve Your Most Complex Data Challenges

Collect, archive, process, and review data from multiple sources, including the most widely used collaboration tools, with KLDiscovery's streamlined solutions.

KLDiscovery's technology-enabled services and software empower you to complete one-off collections from numerous data sources for matters. Additionally, our data management and eDiscovery solutions with automated workflows increase your organization's efficiency to support ongoing litigation needs.

 **Nebula**[®]
ECOSYSTEM

The Nebula Ecosystem is a comprehensive approach to eDiscovery and information governance, encompassing:

- Collection
- Analytics
- Compliance
- Processing
- Production
- Preservation
- Review
- Archiving

 **Nebula**
ARCHIVE[™]

A next generation archiving solution, Nebula Archive is a key component of the Nebula Ecosystem built to address modern enterprise data management needs at scale. Retention policies, defensible deletion, and preservation controls are built in, allowing your organization to capture and manage important data without the risk of keeping redundant, outdated, or trivial material.

KLDisccovery

KLDiscovery's Nebula Archive is a robust archiving platform that serves as an efficient, long-term solution for the full range of your enterprise data management and eDiscovery needs.

Use Case

A large financial institution needed to **automate data collection** for archiving, early case assessment, and faster review.

Challenges

- Difficult to acquire data from the original source and move it from legal hold to review
- The time and labor required to manage importing, exporting, processing, and setting up a repository for the data were unsustainable
- With many moving parts, there were multiple opportunities for failure

Solution

- Nebula Archive provides daily automated capture from the in-scope data source through a connector and stores the collected data
- Full-featured text and metadata searches enable faster identification

Outcome

- KLDiscovery's proprietary processing mechanisms manage the data coming in and represent it in a review platform ensuring an effective and efficient review process for the financial institution
- Data in Nebula Archive is ready for review anytime, eliminating the need for time consuming administrative tasks
- With the ability to glean key information faster, the financial institution has the upper hand in litigation events
