

Oxygen Analytic Center

Share the right data with the right people at the right time.

Real-time, collaborative data review and analysis.

Criminal investigation. Corporate investigation. eDiscovery.

Our collaboration solution was created for law enforcement, government agencies, enterprises, and service providers seeking to streamline their investigations and eDiscovery by enabling:

- Remote work any time, anywhere with simultaneous access for multiple users.
- Secure role-based data access with cloud or local server behind firewall.
- Support for broad-based evidence sets.
- Easy-to-use review platform.
- Advanced analytics.
- Cost-effective perpetual licensing.
- 98% satisfaction-rated support and training.

Who we are.

We are a privately held U.S.-based company of practitioners, from the CEO on down, who design and build the best tools for law enforcement, government agencies, organizations, and businesses in more than 150 countries.

Reduce investigation backlogs through real-time collaboration

Law
Enforcement

Providers

Seamless access and collaboration

- Secure, web-based tool that allows simultaneous, real-time collaboration.
- Accessible by anyone with permission and a browser.
- Needs only an internet connection via any type of device: desktop, laptop, tablet, mobile phone.
- Quick Start video helps new users get to work fast.

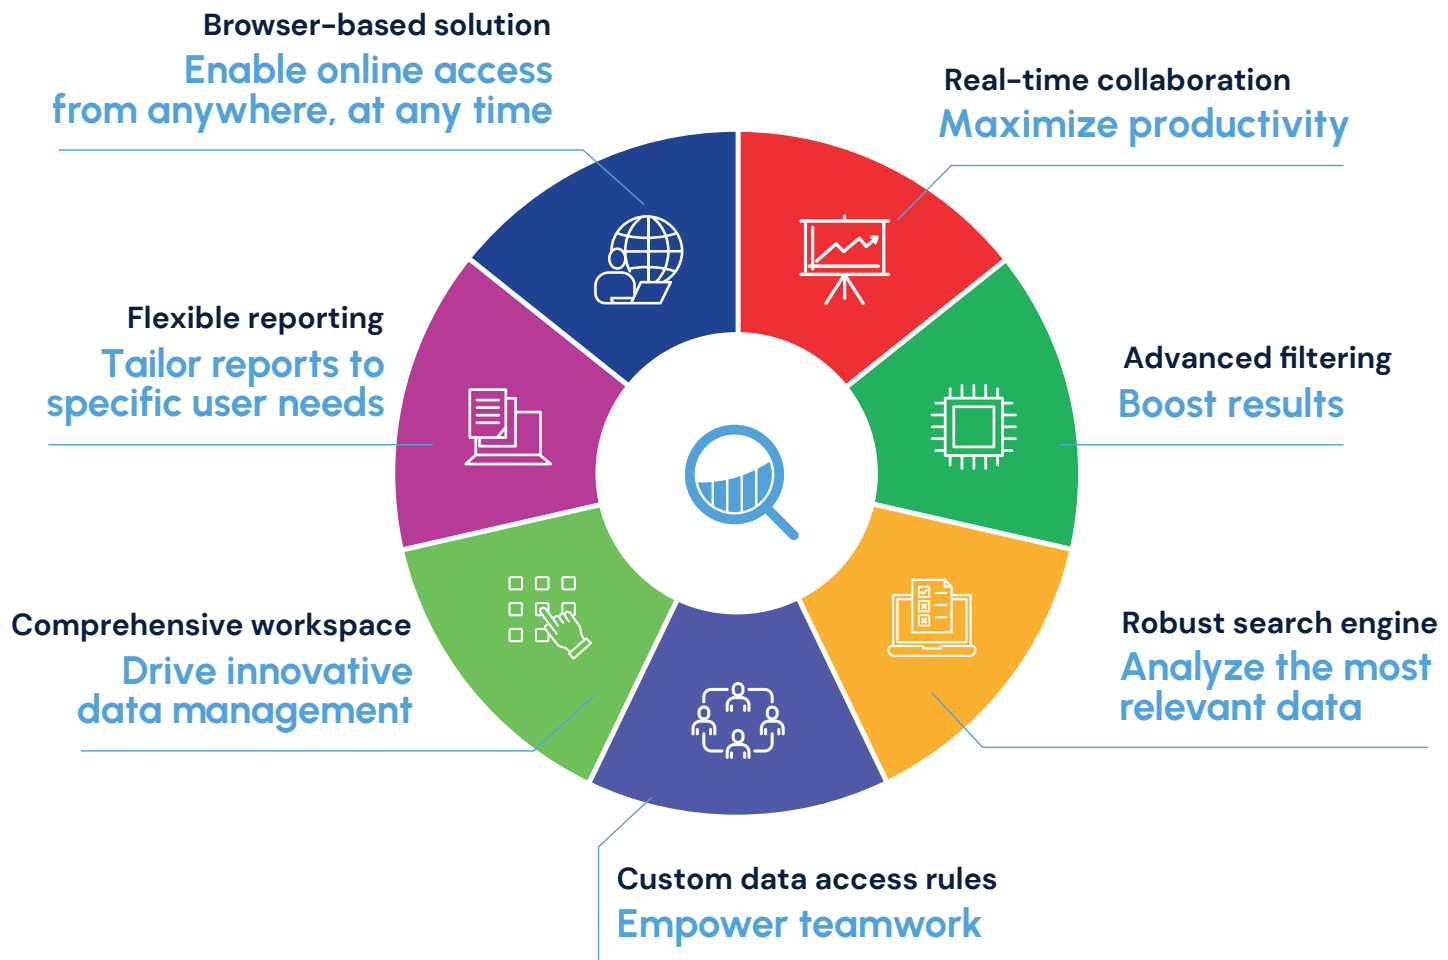

Powerful data control

- Data resides in your own database, behind your firewall, protected by your security protocols.
- Your database admin controls access and permissions.
- Advanced filtering and easy-to-use search capabilities boost results.
- Search, analyze, tag, bookmark, review, and report.

Faster resolution and cost savings

- Focus users on data most relevant to their role to reduce or eliminate backlogs.
- Maximize productivity as multiple people work on a case simultaneously.
- Speed resolution of investigations and cases with fast, real-time sharing of the data and analysis.
- Import and analyze extractions made with Oxygen Forensic[®] Detective, third-party forensic tools, and PST/OST files.

Better productivity and time saved through collaboration

Leverage advanced analytics to quickly find the right information among volumes of data, increase insights, and decrease time

- Keyword statistics
- Similar data analysis
- Event analysis
- Integrated advanced analytics
- Location analysis
- Advanced search
- Classifying evidence
- Tailored reports

Cost-effective never-ending right to use licensing
