MOTIVATION

Effective witness preparation requires simulated training and real-time feedback—yet these are often absent due to cost and time constraints, limiting access to only the highest-value cases.

TestMyWitness.com is solving this problem by introducing AI-enhanced witness preparation, designed to augment, not replace, lawyer expertise. Leveraging Emotion AI and LLM-driven legal analytics, the platform scales expert-level witness training, detects credibility risks, and provides real-time feedback, empowering legal teams to refine testimony with precision.

Addressing an unmet need in the Legal industry

TestMyWitness fills the critical gap in litigation preparation by providing:

- ✓ **AI-Enhanced Practice** – Witnesses sharpen their responses through simulated testimony with automated AI feedback on clarity, confidence, and consistency.
- ✓ **Work Product Insights** – AI-generated reports provide data-driven analysis, flagging areas for improvement and ensuring witness credibility is maximized before opposing counsel can exploit weaknesses.
- ✓ **Courtroom-Ready Witnesses** – By combining real-time coaching with post-session analysis, witnesses walk into depositions and trials fully prepared, reducing inconsistencies and stress.
- ✓ **Revenue Growth for Law Firms** – TestMyWitness transforms witness preparation into a

billable service, adding up to 8+ billable hours per case and generating 5–6X ROI per dollar spent.

AI that enhances Legal expertise, not replaces it

Unlike many legal AI tools focused on cost-cutting and automation, TestMyWitness is additive, empowering lawyers rather than replacing them. The platform complements traditional legal expertise by:

1. Providing faster, more precise feedback than traditional coaching
2. Scaling witness preparation across multiple cases without extra overhead
3. Improving client confidence by delivering stronger case outcomes

“Winning a case starts long before trial. TestMyWitness ensures attorneys and their clients are equipped with the most advanced preparation tools available today, making testimony more predictable, composed, and impactful.”

Karl Schieneman JD/MBA, President, TestMyWitness

Experience AI-Enhanced witness preparation at LegalWeek 2025.

Legal professionals attending LegalWeek 2025 can experience TestMyWitness live at Booth #1326, where the team will demonstrate how AI-enhanced preparation is reshaping litigation strategy, improving witness performance, and increasing law firm profitability.
