

Filevine for In-House Legal Teams

Transforming Legal Ops

You're expected to manage risk, drive efficiency, and do more with less, all while under constant pressure to prove value. Filevine helps legal teams operate like a high-performance business unit, not a cost center.

Why Legal Departments Are Choosing Filevine

Organize Every Matter and Document

Centralize case files, emails, and documents in a single, secure platform. Customize workflows, control access, and track versions with full audit trails. Powerful search tools retrieve exactly what you need, when you need it.

Speed Up Contracts

Manage contracts from intake to execution. Automate approval flows, clause libraries, and redlines. Close deals faster without legal becoming the bottleneck.

Visualize Legal Ops Performance

Use dynamic dashboards to surface insights your CFO actually cares about: cost savings from outside counsel, contract turnaround time, matter resolution trends, and more.

Stop explaining your value and start proving it.

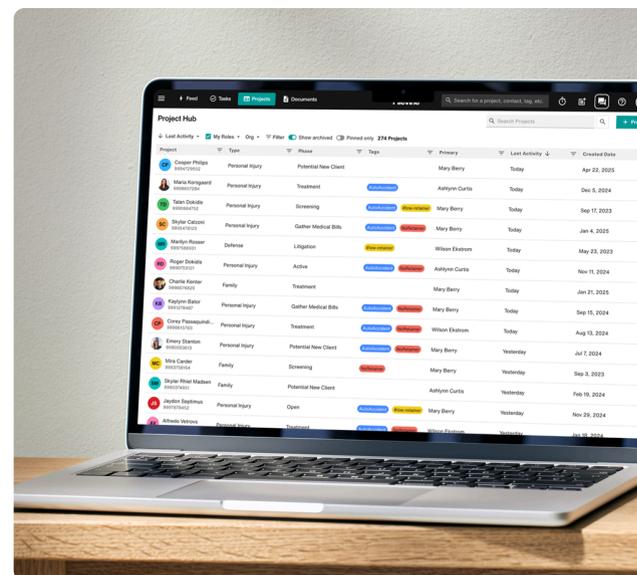

Adapt Without IT

Legal doesn't need to wait for IT. Configure templates, dashboards, workflows, and document types on your own. Whether you're handling litigation, compliance, or contracts, Filevine flexes with your department.

Empower Your Legal Team with Filevine

With Filevine, in-house counsel can drive efficiency, reduce risk, and become true business partners. Filevine gives you the platform to lead your legal operations into the future.

A Platform Built for In-House Legal Teams

Smart Document Management	Version control, clause libraries, redlining, and eSignature all in one place. Syncs with Outlook, so emails and attachments land where they belong.
Contract Lifestyle Management	Standardize contract creation with automated routing and approvals. Never chase down signatures or lose track of expiration dates again.
Data-Driven Decisions	Track KPIs like cycle times, costs, and risk exposure. Use prebuilt dashboards or create your own — no spreadsheet wizardry required.
Workflow Enhancements	Pull emails into projects, assign tasks instantly, and eliminate inbox chaos. Keep everyone aligned and accelerate task completion with automated checklists.
Access Control	Set role-based permissions so individuals and departments only see what matters to them. Keep sensitive data secure and optimize collaboration across teams.
No-Code Configuration	Customize dashboards, fields, and templates for every matter type from employment disputes to M&A. Do it all without developer help.
Security and Compliance	Hosted on AWS with SOC 2, HIPAA, and CJIS compliance. Full encryption, role-based access, and detailed audit logs keep your data protected.
